

# EPAT

(Extracorporeal Pulse  
Activation Technology)

## BENEFITS OF EPAT:

Non-invasive  
Non-surgical  
No risk of infection  
No scarring  
No downtime  
Faster healing

## EPAT TREATS:

Plantar fasciitis  
Achilles tendonitis  
Tendon Pain  
Partial Tendon Tears  
Neuromas

## PACKAGES:

(Includes 4 Weekly Treatments)

\$500 Single Foot  
\$700 Both Feet

Additional treatments:

(as needed)  
\$150 single foot  
\$200 both feet

— **NORTHEAST** —  
**Foot and Ankle**

\*Expires 1 year after date of payment  
No refunds of missed/canceled/unused session after that date.

# What is EPAT Therapy?

EPAT is an FDA cleared, non-invasive treatment that uses pressure waves to stimulate metabolism, enhance blood flow and accelerate healing that gradually regenerates and eventually heals damaged tissue.

## **What to expect during treatment?**

Generally sessions take about 5-10 minutes. Treatments will be delivered over four weekly sessions. A gel will be applied to the affected area. Then the EPAT wand is used to deliver pressure waves in a circular manner over the affected area.

## **How soon will I feel the results?**

Some patients report immediate pain relief but it can take up to 4-6 weeks for pain relief to begin and 12 weeks to see the full affects. Over 80% of patients report resolution of pain or have a significant pain reduction.
