

# MLS Laser Therapy!

## What is Laser Therapy?

Laser therapy is use of specific wavelengths of light to treat painful conditions.

## How does it Work?

Light energy enters the damaged cells and stimulates inter-cellular activity. This reduces pain and speeds recovery of the damaged cells.

## What to expect during a treatment?

MLS Laser Therapy is a **painless** treatment! The treatment lasts an average of 8 minutes. You may experience a **comfortable** sensation at the point of application.

## How soon will I feel the results?

The effects of treatments are cumulative; therefore, expect to see improvements as you proceed through your treatment plan.
